

## Regular Diesel... Jus de Brazil...

People can be very creative with file names. But even if they're not, it's sometimes hard to find a cup of coffee, when it's called café, Kaffee, or koffie...

The name doesn't have to prevent you from finding the data. Not anymore.

 *Financial suite* © makes the life of financial professionals easier by standardizing document names and adding meta data to all files.

**They're good, but expensive**

You know all about the time-value of money. So do external auditors. Helping them to save time makes good business sense.

The  *Financial suite*® created by Smart SharePoint Solutions is a very powerful tool to streamline reporting processes, keep a solid audit trail on all documents and assure accurate, timely and complete reporting.

If everyone knows the routine, why not make it a routine?

**Less obvious than  
you might think**

The Microsoft SharePoint®-based  *Financial suite*® offers an extensive library of tasks and deliverables for planning & control, budgeting, forecasting, and reporting.

Each element is fully integrated with advanced project management functions, such as: RSS feed, e-mail alerts, version control, approval and archiving.

If you are surprised that this didn't exist already, can you imagine how it would feel to have it?

If you like SharePoint,  
you will love  *Financial suite* ©

 Microsoft  
SharePoint 2010

Home > Overview > Benefits > Overview

As a fully secured web-based solution the  *Financial suite* © offers the convenience of enormous flexibility. It makes you less dependent on individual colleagues or out-of-sync working hours.

What makes this tool powerful and unique, is that we have added 25 years of experience in corporate finance. Even better: if you buy the product, you can tap from the knowledge of a growing team of experts.

Fundamental. Ready to use.

 *SmartSharePointSolutions*

**If you are in finance, we should be in business**
